Alphabet Inc.

Revenue Trajectory Restored at 20%+ w/Incremental Disclosures & Bigger Buyback; Raising PT to \$1,420

Key Takeaways from Alphabet Earnings & Calls w/Management:

1) Revenue Growth Returns to 20%+. Following a few months of consternation around Alphabet's revenue growth, including fears of further deceleration, FXHN revenue reaccelerated to 22% growth, essentially in-line w/the levels of 2018. Mobile search, YouTube, and Cloud were the primary Alphabet drivers, w/acceleration across all regions. Google Properties specifically saw ~21% FXHN revenue growth led by mobile search, YouTube, & desktop search. Yes, desktop search continues to grow. The Google Segment's 'Other Revenue' also came in 9% above our estimate driven by Cloud, Google Play, & hardware. Management did not provide more detail on product changes or other factors that may have pressured 1Q growth & subsided in 2Q, but continued to emphasize that ad products roll out in stages & Google makes 100+ ad changes every quarter. Management also confirmed strong YouTube growth & that removal of YouTube content has had virtually no impact on revenue.

2) Heavy Investment in Cloud Continues. Google revealed that Cloud is on an \$8B run-rate, up from \$4B at 4Q17. We believe the trajectory is in-line w/our previously published estimate (link) for Google Cloud revenue of \$8.5B-\$10B in 2019. Cloud was the largest driver of Google 'Other Revenue' & the 3rd largest for Alphabet overall. For comparison, AWS is on a \$33B run-rate, 4x the size of Google Cloud, & Azure is on a ~\$17B run-rate. Google continues to invest aggressively into Cloud, w/particular emphasis on the go-to-market strategy including sales, service, partnerships, & ops teams. Cloud is the biggest area of hiring for Google & mgmt. expects to triple the sales force over the next few years. We'd also note that on its conference call Amazon highlighted increased sales & mktg hiring for AWS as well, suggesting the competition for enterprise talent is ratcheting up.

3) <u>Better Disclosure + Bigger Buyback = A Bit More Shareholder-Friendly.</u> We are encouraged to see GOOGL mgmt provide some incremental disclosures & color around the business. Beyond the Cloud run-rate, which hadn't been disclosed since 4Q17, we believe mgmt. provided more detail around the drivers within Cloud, greater Play & hardware disclosure, more granularity on capex breakdown, & slightly

expanded commentary on the outlook. Mgmt indicated it is pleased w/ongoing momentum off a large revenue base & that it is confident in the ongoing opportunity set. Alphabet also announced a \$25B share buyback authorization, up from \$12.5B in its most recent round in January 2019. When complete, Alphabet will have repurchased ~\$60B of stock since 2015.

Overall, 2Q results put Google's revenue trajectory back on track & highlight mgmt's confidence in future growth, led by machine learning. Alphabet operating margin of 24% also came in nearly a point above expectations w/leverage in TAC and S&M offsetting some of the compression from Other Cost of Revenue. We come away from 2Q earnings incrementally positive based on Alphabet's restored revenue trajectory, profit upside, increased disclosures, & stepped-up buyback. Alphabet's machine learning focus is more compute intensive, and therefore more expensive to operate, but it also opens up new revenue opportunities across the businesses and drives operating efficiencies. We are establishing our December 2020 PT at \$1,420 (up from prior \$1,310) based on 21x our 2021E Google Segment GAAP EPS of \$67.48.

Investment Thesis, Valuation and Risks

Alphabet Inc. (Overweight; Price Target: \$1,420.00)

Investment Thesis

We believe Alphabet's fundamentals are strong and that the company will remain a primary beneficiary of the secular shift to online spending. Google remains focused on innovation across its advertising businesses and new offerings, which is helping Google sustain a DD growth off of a large base. We continue to believe there is meaningful runway across search and YouTube as ROI improves and TV dollars shift more online. Google Segment's other businesses such as Cloud, Play, and Hardware have strong momentum, and companies within Other Bets, incl. Waymo, provide option value. And with DD 2017-20E CAGRs for revenue and profits, we believe GOOGL shares remain attractive.

Valuation

We are establishing our December 2020 PT at \$1,420 (up from prior \$1,310) based on 21x our 2021E Google Segment GAAP EPS of \$67.48. We believe Alphabet shares should trade at a premium to the S&P 500 as Alphabet maintains a dominant position in the global online ad industry $w/\sim 1/3$ share, and is one of the few companies in the S&P 500 w/DD revenue and EPS growth off of a very large base.

Risks to Rating and Price Target

Downside risks include 1) potential for a return to heavy investment spending and margin compression; **2)** continued competition for engineering talent; **3)** increased regulatory scrutiny; and **4)** next major revenue drivers—potentially Cloud, Hardware, and Waymo—may not materialize.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, www.jpmorganmarkets.com.
